# The **go to** hospitality solution

# Our Customers

# Our Unique Services

## Training

A variety of training courses to meet you and your suppliers needs enabling maximum benefits.

## Supplier Portal

We make it possible for your suppliers to self administrate their own catalogue: Prices, Allergens and SKU changes, so you don't have to!

## Supply Chain Management

We provide a full managed solution for you and your suppliers to trade in complete transparency.

# Our Unique Service

## Hosting

Procure Wizard is a fully hosted SAAS solution. Safe and secure!

## Supplier Onboarding

With our on boarding suppliers service - no need to employ an army of admin staff to maintain the integrity of the data.

## Data Management

We categories the FnB products, manage your P2P cycle, take care of the order sending and manage the invoice capture

# Adding Value

## Labour Saving 50%

50% reduction in the time required to process invoices and manage food and beverage costs.

## Costs Reduction 10%

Average savings of 10% in your annual purchasing costs by controlling approved buyers, managing purchasers and using our cost commitment functionality.

## Invoices Processing 95%

95% of paper invoices removed, replaced with a fully automated P2P process with the final 5% captured using our unique integrated scanning software

Professional Services

# Testimonials

Procure Wizard has allowed us to manage suppliers and food stocks but, most importantly, it has significantly streamlined our accounting systems. The simplicity of order creation to invoice matching and price comparison at the time of ordering is exceptional. Reconciling the correct credits against supplies is also a lot easier and less time consuming.

## Q Hotels

“The focus on our suppliers, both in terms of the training and customer care, has been one of the most surprising elements of our relationship with Procure Wizard. We expected a high level of service but have been impressed that the service culture has carried through to our suppliers. I’m sure this, in part, has helped us achieve 100% supplier onboarding and 100% business compliance in terms of system utilisation.”
