

LEVERAGING AI IN HOSPITALITY

DR ERIN LING

The TUCO Conference 2024

AI/WORK/HOSPITALITY

DR ERIN LING

Lecturer in Artificial Intelligence
and the Future of Work

Surrey Institute for People-Centred AI
School of Hospitality and Tourism Management
University of Surrey

Erin explores the intersections of **artificial intelligence**, people, businesses, and society, focusing on the applications and implications of AI in the **hospitality** and **tourism** sectors, including AI adoption and use, the future of work, human-AI interaction/teaming, digital marketing, consumer behaviour, and the ethical considerations of AI-assisted systems.

AGENDA

**AI & Robots
Transform the Food &
Restaurant Industry**

**Real-world
Examples &
Implications to
Campus Catering**

**Leadership
Actions**

Example:
Open AI ChatGPT

Classification of artificial intelligence (AI) systems

Khosravi, Sudani & Oladnabi (2023)

AI IN RESTAURANTS

- 01: SERVICE ROBOTICS
- 02: AI ASSISTANTS
- 03: INVENTORY MANAGEMENT
- 04: REAL-TIME FEEDBACK ANALYSIS
- 05: AI SELF-CHECKOUT
-

SERVICE ROBOTICS

Kitchen Robotics

Robotics Delivery

1

MISO ROBOTICS - Flippy

Automatic dispenser, Autobins, Speciality baskets, Consistency & Speed, Safety

<https://www.youtube.com/watch?v=Y1y94D84bm0>

Using scoops, tongs, and spoons, **Alfred** learned to assemble salads and poke bowls, including ingredients such as iceberg lettuce, tuna, and quinoa.

DEXAI ROBOTICS

Blendid has created autonomous, AI-powered robots that can make personalised smoothies.

The company has partnered with several college campuses to bring healthy food options to students, available at any time.

Robot barista in Sungkyunkwan University, South Korea

Haidilao Hot Pot Smart Restaurant in
Beijing, China

Beijing's first AI-powered restaurant

Grubhub and Starship Technologies rolled out its robot food delivery service on the Sam Houston State University campus in Huntsville.

Starship Technologies' Autonomous Robots deliver food across university campuses, using AI to navigate and deliver orders directly to students, providing safe and contactless food delivery options. Available at universities including George Mason University and Northern Arizona University.

University of Roehampton

Which one do you trust more?

Technophobia – Robophobia

“Fear of robots and AI systems”

- Negative Attitude toward Robots (NARS):
- Negative attitude toward interacting with robots
- Negative attitude toward robots' emotion
- Negative attitude toward social influence of robots

Nomura et al. (2004); Nomura, Kanda, & Suzuki (2006)

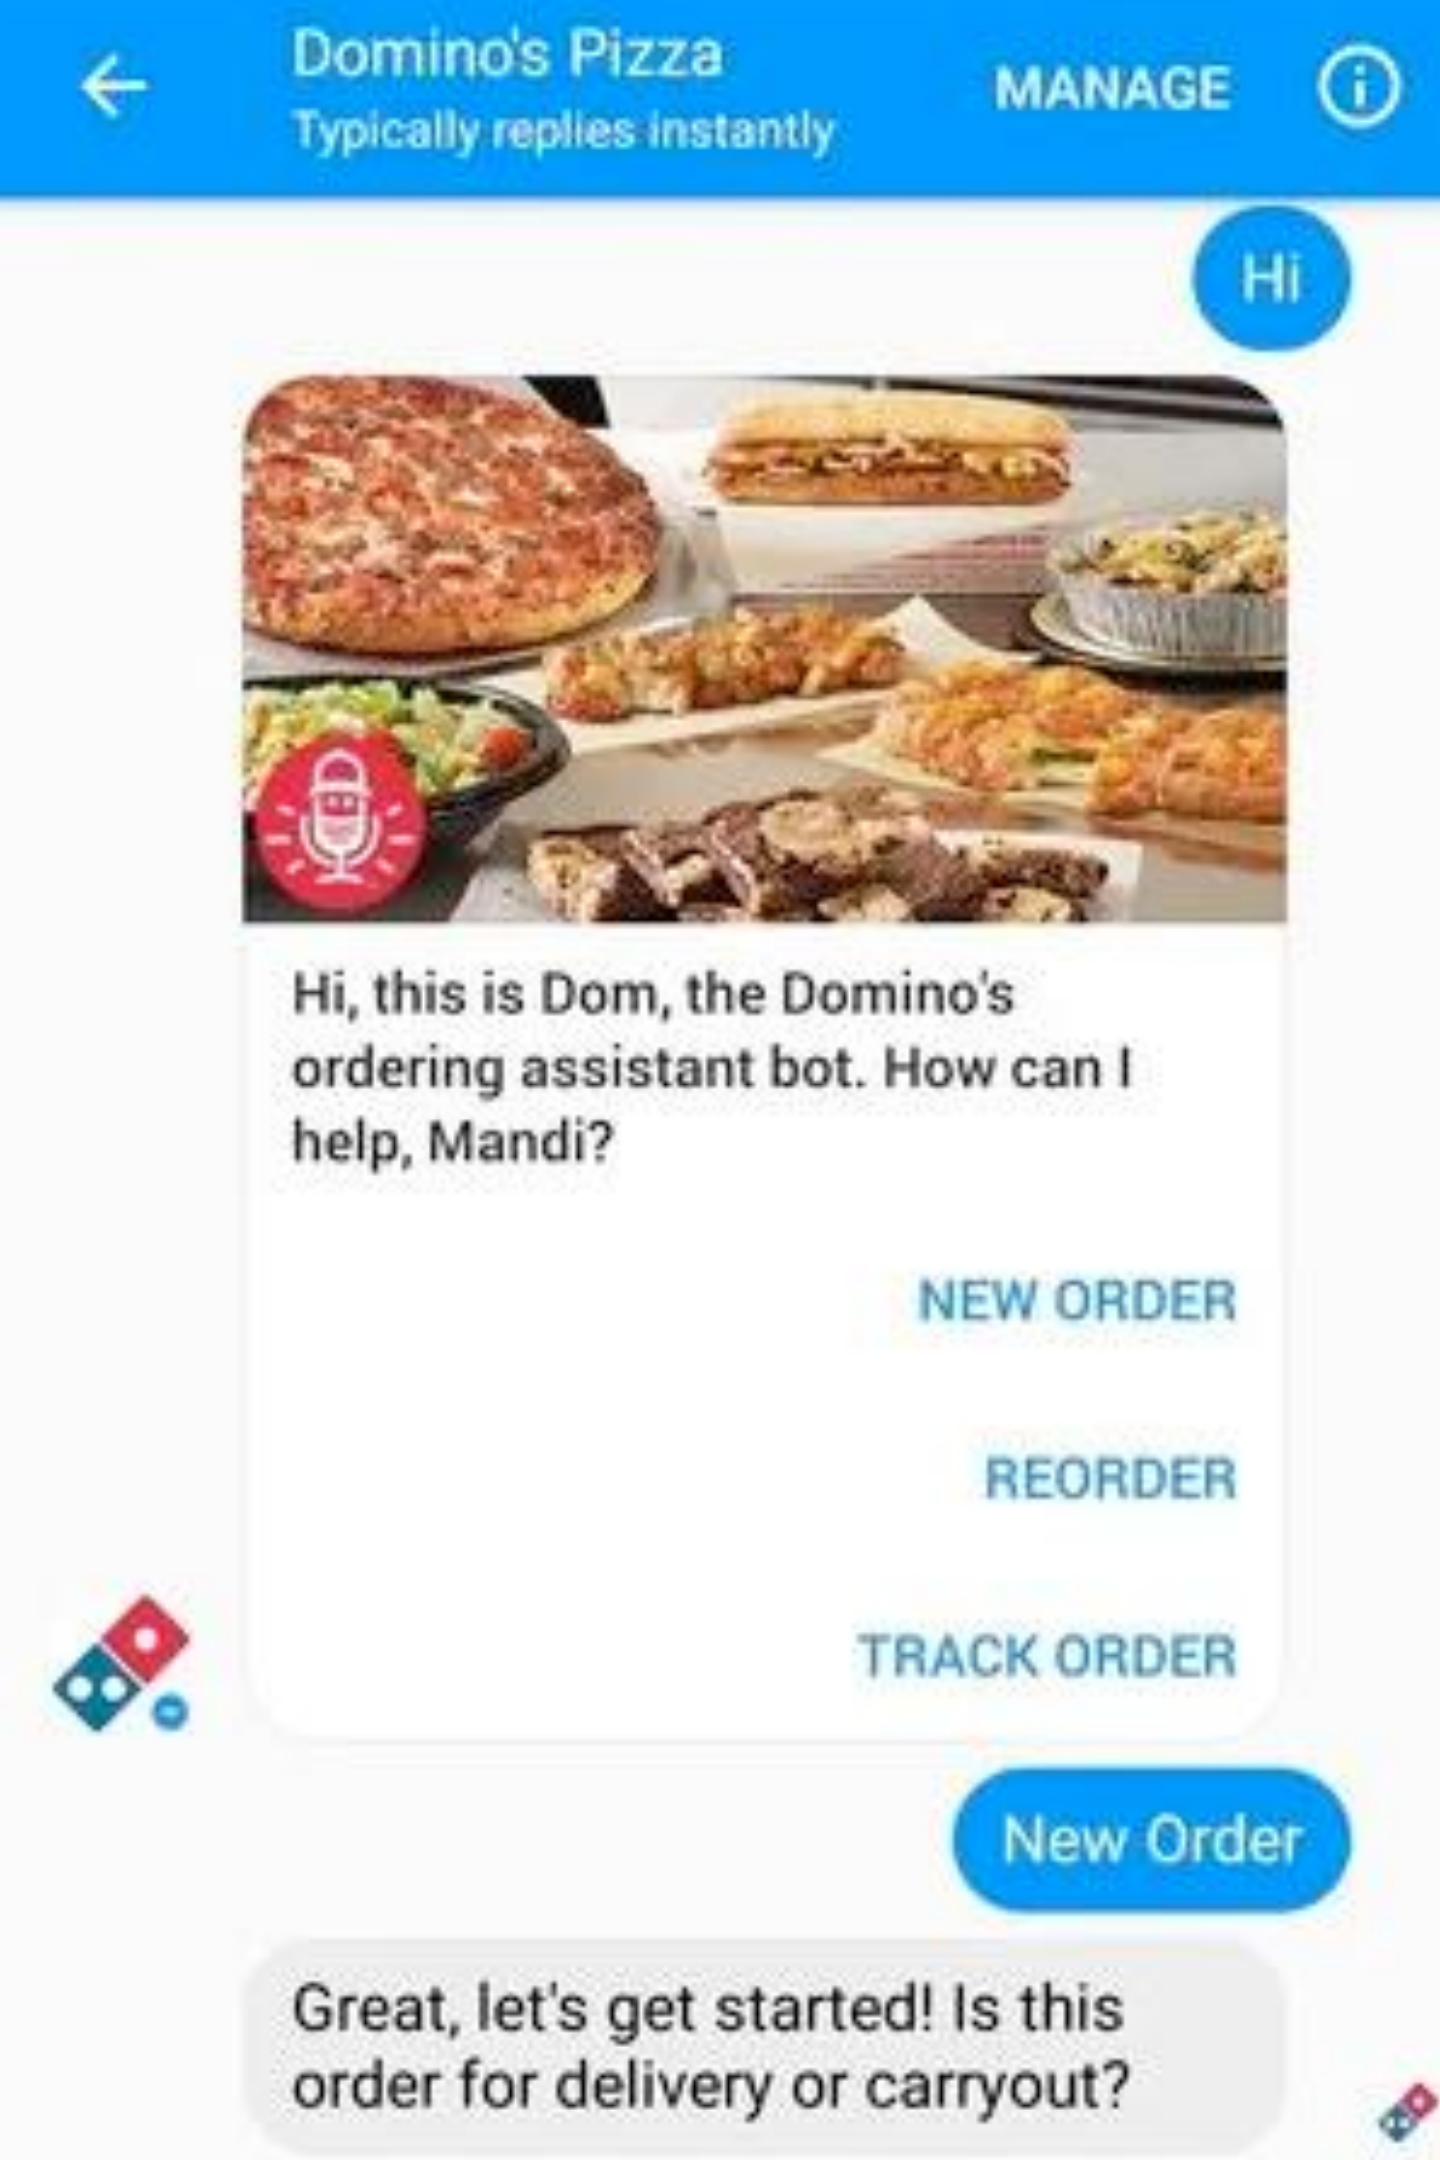

AI ASSISTANTS

Chatbots

Voice Assistants

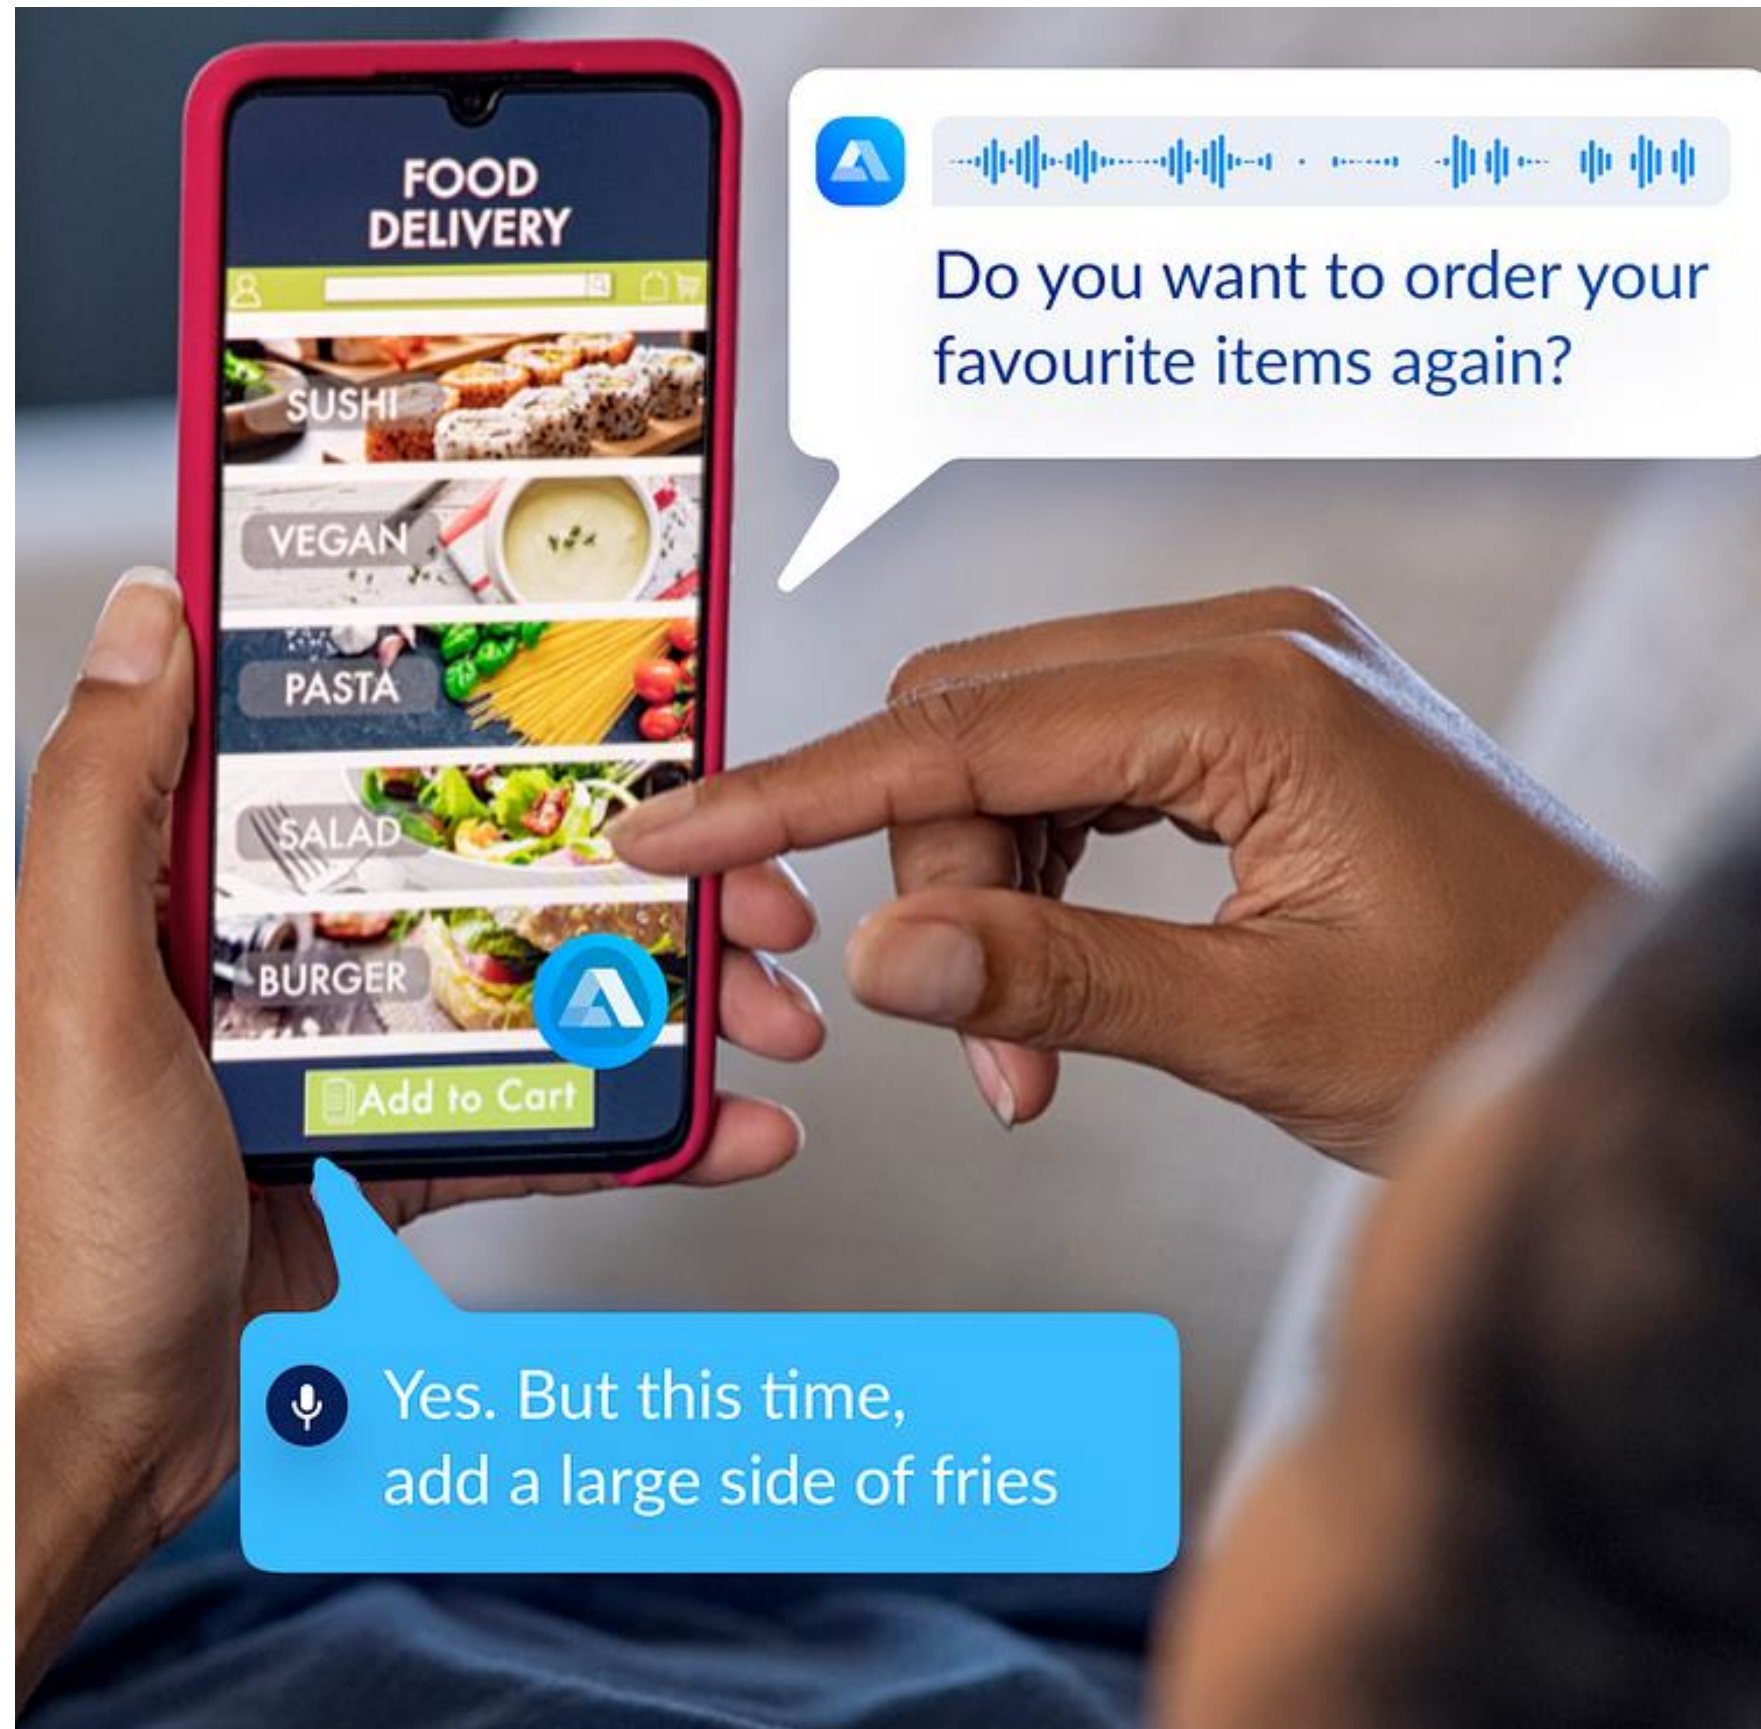

2

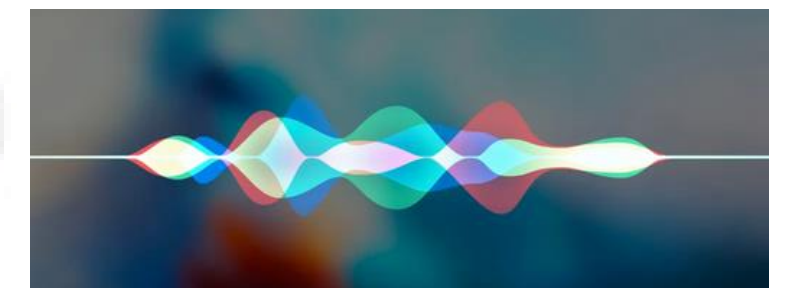

Domino's Pizza is partnering with Microsoft Cloud and Azure OpenAI Service to create a generative AI assistant that can help improve both employee and customer service.

Voice Assistants

Hi, how can I help?

Siri restaurants near me
Tap to Edit >
OK, here's what I found:

Voice Assistants

Take orders at Drive-Thru Restaurants

AI-based Voice Ordering System

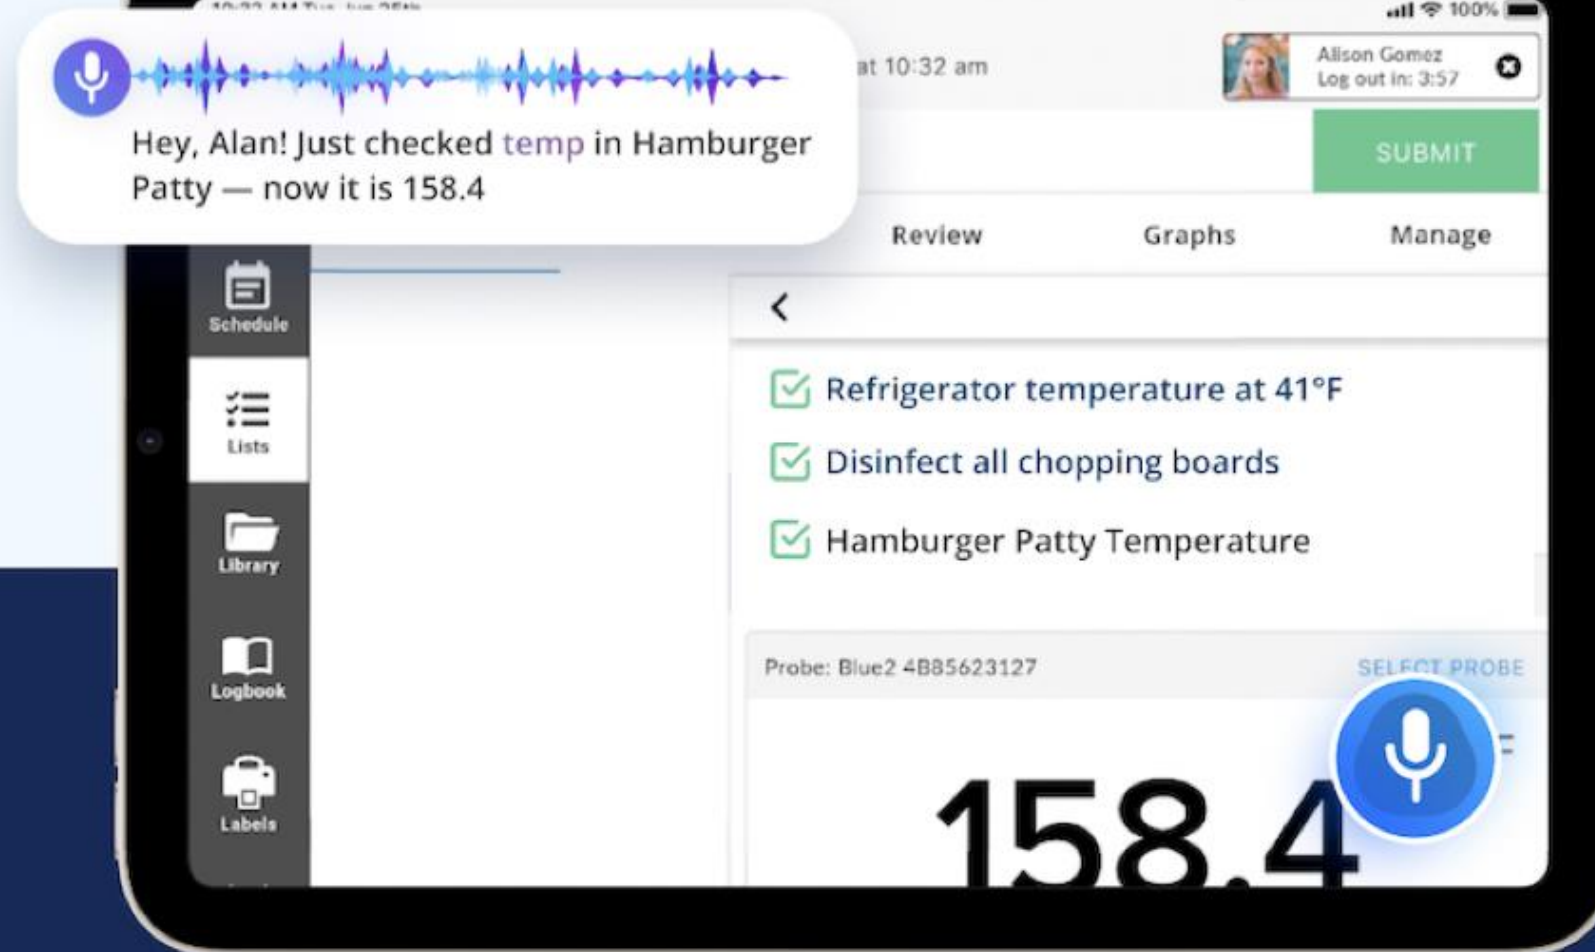

Wingstop partners with **ConverseNow** to use its “virtual ordering assistant”. The bot can take multiple phone orders at once, cutting down on hold times and dropped calls and freeing up employees.

AI Phone Answering

Poppy's Pizza & Grill: in three months, Popmenu AI Answering fielded 3.6k calls for the restaurant (nearly 40 calls a day!) with 43% of calls tying to revenue activity.

Locals Pub & Pizzeria: online sales increased by 132% in their first 90 days with automated phone answering.

IMPLICATIONS TO SMART CAMPUS CATERING

How can AI Assistants be used
in campus catering?

1. Menu Assistance and Dietary Information

- Personalised Recommendations: suggest meals based on individual dietary preferences, allergies, and nutritional goals (e.g., recommend vegetarian, vegan, gluten-free, or low-calorie options).
- Nutritional Information: provide detailed nutritional information for each menu item, helping students make informed food choices.

2. Ordering and Payment Processing

- Streamlined Ordering: take orders directly via mobile apps or websites, reducing wait times and streamlining the process; handle modifications, special instructions, and customisation of meals.
- Payment Integration: facilitate payment through various methods, including campus meal plans, credit/debit cards, and digital wallets.

3. Customer Support and Queries

- Real-Time Assistance: provide real-time responses to queries about menu items, opening hours, locations, and more; reduce the workload on human staff and ensure consistent communication.
- Feedback Collection: collect feedback from students, helping catering services to improve their offerings.
- Complaint Handling: log complaints, provide immediate responses, and escalate issues to human staff if necessary.

4. Promotions and Notifications

- Special Offers and Discounts: inform students about ongoing promotions, special menus, or discounts available in campus dining facilities.
- Event Announcements: notify students about special events, new menu launches, or changes in opening hours.

5. Operational Efficiency

- Inventory Management: By tracking orders and popular menu items, AI systems can assist in managing inventory, reducing waste, and ensuring the availability of ingredients.
- Analytics and Reporting: provide insights into customer preferences, peak times, and other data-driven insights to optimise operations.

Self-Service Technology (SST) – what has changed?

Service Quality

~~Service Personnel~~

Human – Computer Interaction (HCI)

User Experience (UX)

OPTIMISING INVENTORY MANAGEMENT

3

Reduce food waste

Winnow Solutions: track and reduce food waste. Their smart bins weigh and identify discarded items, providing real-time data and insights to chefs and managers, enabling them to make informed decisions about menu planning and portion control.

Too Good To Go: connects restaurants with customers looking to purchase surplus food at a discount, reducing food waste while also providing revenue for restaurants.

Rubicon: optimise waste and recycling processes, reducing unnecessary waste and diverting it from landfills.

DIGNITY

6月26日 11:54

学你好，这条短信来自校学生资助管理中心。近期我们发现你在食堂用餐期间校园卡消费较低，所以向你的校园卡内打入 200 元。希望能够帮助到你，并且也希望你能奋发图强、努力学习！我们会一直关注每一位需要帮助的同学，你可以通过0516-83590187，公众号“矿大资助”或zzglzx@cumt.edu.cn联系我们。加油！

6月26日 17:44

谢谢您的关心，感谢我校学生资助管理中心，我一定努力学习，不辜负学校的期望

“Recently we found that your campus card consumption was relatively low during your mealtime in the campus canteen, so we put 200 yuan (about £21.46) into your account. Hope it helps.”

China University of Mining and Technology (CUMT), Xidian University, Nanjing University of Science and Technology, University of Science and Technology of China, and Zhengzhou University have all provided financial aid for poor students in similar ways

- Smart workforce management: optimising staff scheduling
- Predictive maintenance for kitchen equipment
- Data predictions: demand forecasting, dynamic pricing strategies
- Delivery processes: optimising delivery routes (e.g., Deliveroo, Uber Eats)
- Menu optimisation and personalisation
- Digital marketing strategies: generative AI content creation

Real-World Examples

- **Apicbase**: monitors ingredient amounts in recipes or beverages, manages the scheduling of fresh deliveries, and automates recipe cost calculations.
- **Ottimate**: streamlines operations by autonomously extracting data from invoices and receipts, offering valuable insights, and facilitating vendor payments and invoice dispatch.
- **Tablein**: automates reservation process and offers analytics
- **MarketMan**: inventory management system
- **Wobot AI**: enhances businesses with its video intelligence solution, transforming standard security cameras into smart operational tools. Empowering businesses to oversee restaurant operations, streamline service workflows, monitor staff productivity, and manage incidents or tickets.
- **Lunchbox**: a digital ordering and order management system
- **Tidio**: provides AI-powered chatbot and live chat services tailored for businesses.

A HUMAN-AI PARTNERSHIP

The human is operating a control panel,
while the robot is assembling a product

REQUIRING SOCIAL AND EMOTIONAL INTELLIGENCE

Empathy

Communication

Observation

LEADERSHIP ACTIONS

- Navigating AI with Judgment and Open Dialogue
- Set the Tone
- Encouraging Ethical AI Practices
- Model the Behaviours
- Embed in Operations with Supported Staff Training
- Protecting Student/Staff Data Privacy
- Promoting Transparency and Accountability

IT'S NOT A THREAT!

IT'S AN OPPORTUNITY !!

THANK YOU!
